

THE
LONDON, EDINBURGH, AND DUBLIN
PHILOSOPHICAL MAGAZINE
AND
JOURNAL OF SCIENCE.

CONDUCTED BY
SIR OLIVER JOSEPH LODGE, D.Sc., LL.D., F.R.S.
SIR JOSEPH JOHN THOMSON, O.M., M.A., Sc.D., LL.D., F.R.S.
JOHN JOLY, M.A., D.Sc., F.R.S., F.G.S.
RICHARD TAUNTON FRANCIS
AND
WILLIAM FRANCIS, F.L.S.

"Nec araneorum sane textus ideo melior quia ex se fila gignunt, nec noster
vilior quia ex alienis libamus ut apes." JUST. LIPS. *Polit. lib. i. cap. 1. Not.*

VOL. XLVIII.—SIXTH SERIES.

JULY—DECEMBER 1924.

LONDON:

TAYLOR AND FRANCIS, RED LION COURT, FLEET STREET.

SOLD BY SMITH AND SON, GLASGOW;—HODGES, FIGGIS, AND CO., DUBLIN;—
AND YEUVE J. ROYVEAU, PARIS.

“Meditationis est perscrutari occulta; contemplationis est admirari
perspicua Admiratio generat quæstionem, quæstio investigationem,
investigatio inventionem.”—*Hugo de S. Victore.*

——“Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus ferrugine condât,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina coelo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu.”

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. XLVIII.

(SIXTH SERIES).

NUMBER CCLXXXIII.—JULY 1924.

	Page
Sir J. J. Thomson on the Electric Discharge through gases at very low pressures	1
Mr. W. H. George on the Helmholtz Theory of the Struck String.— Part II. Experimental. (Plates I.—III.)	34
Dr. H. Jeffreys on Water Waves near the Shore	44
Mr. W. H. George on the Delemer and the Lamb Theories of the Struck String	48
Prof. A. Ll. Hughes on Ionization, Excitation, and Dissociation of Gases.	56
Dr. N. Sen on the Equation of Long Waves in Canals of Varying Sections	65
Mr. J. E. Calthrop on the Diameters of the Atoms of the Inert Gases.	79
Prof. G. E. M. Jauncey on the Chance of an Electron being Ejected Photo-electrically from an Atom by X-rays	81
Mr. D. B. Deodhar on the Collision of Spherical Bodies of Unequal Diameters and Densities at Very Low Velocities.	89
Mr. E. A. Barclay-Smith on Wave-Power Transmission.	97
Mr. J. J. Manley on Modified Vacuum Tubes.	110
Dr. N. K. Bose on Monoplane Theory	113
Mr. H. L. Riley on Atomic Dimensions and Gaseous Hydride Formation	126
Dr. C. H. Lees on Coupled Cord Pendulums.	129
Mr. E. Buckingham on Dimensional Analysis	141
Messrs. C. H. Bosanquet and T. C. Keeley on a Search for the Missing Element No. 43.	145
Mr. J. E. P. Wagstaff on Experiments on the Duration of Impacts, mainly of Bars with Rounded Ends, in elucidation of the Elastic Theory	147
Prof. F. H. Newman on the Emission Spectra of Mixed Alkali Vapours. (Plate IV.)	159
Dr. G. Lemaître on the Motion of a Rigid Solid according to the Relativity Principle	164
Mr. T. Iredale on Adsorption from the Gas Phase at a Liquid-Gas Interface.—Part II.	177
Prof. B. Iliin on Adsorption Forces and their Electrical Nature.	193
Prof. V. F. Hess and Dr. R. W. Lawson on the Number of Alpha-Particles emitted by Radium	200
Miss Olwen Jones on Reflexion of Plane Polarized Light by Etched Metals. (Plate V.)	207
Prof. M. Siegbahn on a Registering Micro-Photometer for Accurate Measurements	217
Mr. Ross Gunn on the Measurement of very small Changes of Capacity	224
Notices respecting New Books:—	
Prof. E. T. Whittaker's The Calculus of Observations: A Treatise on Numerical Mathematics	203
Dr. J. H. Jeans's Report on Radiation and the Quantum Theory.	227

NUMBER CCLXXXIV.—AUGUST.

	Page
The Research Staff of the General Electric Co., Ltd., on the Strength of Tungsten Single Crystals and its Variation with Temperature. (Plates VI.-VIII.)	229
Dr. L. Simons on the Emission of β - and δ -rays from a Metallic Film, and the Relation to the Quantum Theory of Scattering of X-rays.	250
Messrs. I. S. Bowen and R. A. Millikan on the Fine Structure of the Nitrogen, Oxygen, and Fluorine Lines in the Extreme Ultra-violet. (Plate IX.)	259
Dr. P. Lecomte du Nouÿ on Surface Tension of Colloidal Solutions and Dimensions of certain Organic Molecules	264
Mr. G. Temple on Central Orbits in Relativistic Dynamics treated by the Hamilton-Jacobi Method	277
Mr. W. P. Widdowson and Dr. A. S. Russell on Radioactive Disintegration Series.—Part II.	293
Prof. Was. Shoulejkin on Scattering of Light by very big Colloidal Particles	307
Prof. W. M. Hicks on the Constitution of Spectra	321
Prof. H. Weyl: Observations on the Note of Dr. L. Silberstein: Determination of the Curvature Invariant of Space-Time.	348
Mr. K. Höjendahl on the Electrical Conductivity and certain other Properties of Metals and Alloys on the Basis of Bohr's Theory ..	349
Prof. K. T. Compton and Dr. L. A. Turner on the Band Spectrum of Mercury and the Dissociation of Hydrogen Molecules by Excited Mercury Atoms	360
Proceedings of the Geological Society:—	
Messrs. A. Heard and R. Davies on the Old Red Sandstone of the Cardiff District	364

NUMBER CCLXXXV.—SEPTEMBER.

Dr. A. S. Russell on the Complexity of the Elements.—Part II. Elements of Even Atomic Number	365
Mr. C. N. Wall on the Selection Principle: A Development based upon the Stokes-Thomson Pulse Theory	378
Dr. L.A. Turner on Quantum Defect and Atomic Number	384
Dr. L. Silberstein on the Rotating Earth as a Reference System for Light Propagation	395
Dr. D. N. Mallik on Electron Theory of Aberration and Lorentz Transformations	405
Mr. A. Hare on Some Cases of Polymorphic Transformation Energies	412
Messrs. M. N. Saha and N. K. Sur on an Active Modification of Nitrogen	421
Prof. H. S. Allen on Faraday's "Magnetic Lines" as Quanta.—Part II.	429
Dr. L. B. Loeb on Gas Ion Mobilities and their Independence of the Nature of the Ion	446
Mr. J. R. Cotter on the Escape of Heat from the Earth's Crust	458
Prof. W. B. Morton on the Discontinuous Flow of Liquid past a Wedge of Small Angle	464

Mr. A. J. Bradley on the Crystal Structures of the Rhombohedral Forms of Selenium and Tellurium. (Plate X.)	477
Prof. R. W. Wood : an Experimental Study of Grating Errors and "Ghosts." (Plate XI.)	497
Sir E. Rutherford and Dr. J. Chadwick on the Origin and Nature of the Long-range Particles observed with sources of Radium C.	509
Mr. B. D. H. Watters on the Output of Radiation from the Quartz Mercury Arc during the Period after first striking	527
Mr. E. F. Relf on an Electrical Method for Tracing Stream Lines in the Two-Dimensional Motion of a Perfect Fluid.	535
Mr. R. V. Southwell on the Stability of Laminar Shearing Motion in a Viscous Incompressible Fluid	540
The Research Staff of the General Electric Company, Limited, London, on the Disappearance of Gas in the Electric Discharge (V.)	553
Mr. A. Press on the Dielectric Properties required for Maxwellian Radiation	581
Dr. Wali Mohammad on Spectrophotometry of the Zeeman Effect in very weak Magnetic Fields	586
Prof. S. Chapman and Mr. W. Hainsworth : Some Notes on the Kinetic Theory of Viscosity, Conduction, and Diffusion	593
Prof. A. W. Porter on Eddies in Air	608

NUMBER CCLXXXVI.—OCTOBER.

Sir A. Schuster on the Passage of Light through Transparent Plates. (Plate XII.)	609
Dr. L. Silberstein : Second Memoir on the Determination of the Curvature Invariant of Space-Time	619
Messrs. W. H. McVicker, J. K. Marsh, and A. Stewart on a New Variety of Spectra	628
Miss F. M. Chambers on Application of a Thermionic Valve to the Measurement of the Damping of Vibrations of a Steel Wire	636
Messrs. E. F. Relf and W. L. Cowley : Some Experiments on the Vibration of Bars	646
Mr. G. Greenwood on the Crystal Structure of Cuprite and Rutile	654
Dr. P. Lecomte du Noiÿ on a New Determination of the Constant N of Avogadro, based on its Definition. (Plate XIII.)	664
Prof. Suehamoy Datta on Regularities in Band Spectra. (Plate XIV.)	673
Dr. D. M. Wrinch : Some Problems of Two-Dimensional Electrostatics	692
Prof. W. J. Walker on the Critical Pressure-Ratio for Gases as affected by Variable Specific Heat	703
Dr. B. B. Ray on the Irregularity of the $L\alpha$ Doublet in the X-ray Spectra	707
Mr. G. C. Grindley and Prof. A. M. Tyndall on the Mobility in Air of Ions produced in another Gas	711
Mr. E. C. Stoner on the Distribution of Electrons among Atomic Levels	719
Sir J. J. Thomson on a Suggestion as to the Structure of Light	737
Mr. J. A. V. Butler on the Relation between Metal Contact Potentials and the Peltier Effect	746

NUMBER CCLXXXVII.—NOVEMBER.

	Page
Mr. G. E. Bell on the Impact of a Solid Sphere with a Fluid Surface and the Influence of Surface Tension, Surface Layers, and Viscosity on the Phenomenon. (Plate XV.)	753
Mr. S. Mokroushin on the Determination of Molecular Diameters from Surface Tension Measurements	765
Dr. E. T. Paris on the Determination of the Frequencies of the Resonant Tones of some Compound Resonators used in Acoustical Instruments	769
The Research Staff of the General Electric Co., Ltd.: Studies on the Deformation of Tungsten Single Crystals under Tensile Stress. (Plates XVI.—XXIV.)	800
Dr. J. H. J. Poole and Prof. J. Joly on the Radioactivity of Basalts and other Rocks	819
Messrs. R. Hill and O. R. Howell on Crystal Structure and Absorption Spectra.—The Cobaltous Compounds. (Plate XXV.)..	833
Miss R. V. Wagner on the Damping of Torsional Vibrations in Air at Reduced Pressures	847
The Research Staff of the General Electric Co., Ltd.: A Note on the Theory of Artificial Telephone and Transmission Lines	859
Prof. W. B. Morton and Miss A. I. Woods on Air-waves of Finite Amplitude	866
Prof. D. N. Mallick on Stability of the Atom	884
Messrs. G. Subrahmanian and D. Gunniaya on Curvature of the Spectral Lines in a Prism Spectroscope	896
Mr. W. H. McCurdy on the Striated Discharge in Mercury Vapour.	898
Mr. P. Du Val on the Relations between Antisymmetric Tensors and Tensor-Densities	917
Mr. J. A. V. Butler on the Seat of the Electromotive Force in the Galvanic Cell	927
Dr. S. C. Bradford: Contribution to the Kinetic Theory of Vaporization	936
Dr. F. C. Toy and Mr. H. A. Edgerton: Investigations on the Latent Photographic Image.—Part I. The Relation between the Light Frequency and Number of Developable Centres	947
Prof. H. Nukiyama and Mr. K. Kobayashi on the Measurement of the Natural Frequency of an Inductance Coil at Audio-Frequency	962
Mr. F. A. Ward on the Thermal Conductivity of Bismuth in a Transverse Magnetic Field	971
Mr. G. Stead and Miss B. Trevelyan on Low-Voltage Glows in Hydrogen	978
Prof. W. A. Porter on the Coefficient of Performance of Refrigerating Machines employing Throttle Expansion	1006
Dr. L. A. Turner on Quantum Defect and Atomic Number. —II. The Ionizing Potentials of the Rare Gases and of the Halogen Acids	1010
Mr. W. G. Bickley on the Effect of a Hole in a Bent Plate	1014

NUMBER CCLXXXVIII.—DECEMBER.

	Page
Sir J. Larmor: Why Wireless Electric Rays can bend round the Earth	1025
Prof. W. M. Hicks on Sommerfeld's and Landé's Rules for Classification of Terms and Zeeman Patterns in Spectra	1036
Mr. A. C. Egerton on Vapour Pressures of Monatomic Substances.	1048
Prof. W. M. Thornton on the Thermal Conductivity of Solid Electric Insulators.—II.	1054
Mr. T. Y. Thomas on the Principle of Equivalence in the Theory of Relativity	1056
Dr. R. C. Johnson on an Effect of Argon on the First Positive Band Spectrum of Nitrogen. (Plate XXVI.)	1069
Mr. L. Bastings on the Decay of Radium E.	1075
Mr. H. W. Baker on the Apparent Value of Poisson's Ratio for Beams of Varying Cross-Section	1080
Mrs. K. Stratton and Prof. J. R. Partington on Latent Heats of Fusion.—Part II. Palmitic Acid and Benzene	1085
Dr. D. M. Wrinch: Some Problems of Two-dimensional Hydrodynamics	1089
Messrs. J. M. Mullaly and H. Jacques on the Diffusion of Mercury and of Iodine Vapours through Nitrogen	1105
Mr. H. Lowery on Pole Lines occurring in the Interrupted Arc Spectra of Silver, Gold, and Copper. (Plate XXVII.)	1122
Notices respecting New Books:—	
Prof. G. B. Jeffery's Relativity for Physics Students.	1131
The Mechanical Properties of Fluids	1132
Prof. H. Lamb's Hydrodynamics	1133
Sir W. Bragg and Prof. W. L. Bragg's X-Rays and Crystal Structure	1133
Prof. H. Lamb's The Evolution of Mathematical Physics, being the Rouse Ball Lecture of 1924	1134
Dr. J. W. Mellor's A Comprehensive Treatise on Inorganic and Theoretical Chemistry	1135
Mr. L. B. W. Jolley's Alternating Current Rectification	1135
Prof. H. Dingle's Modern Astrophysics.	1136

P L A T E S.

- I. III. Illustrative of Mr. W. H. George's Paper on the Helmholtz Theories of the Struck String.—Part II. Experimental.
- IV. Illustrative of Prof. E. H. Newman's Paper on the Emission Spectra of Mixed Alkali Vapours.
- V. Illustrative of Miss Olwen Jones's Paper on Reflexion of Plane Polarized Light by Etched Metals.
- VI.-VIII. Illustrative of The Research Staff of the General Electric Co.'s. Paper on the Strength of Tungsten Single Crystals and its Variation with Temperature.
- IX. Illustrative of Messrs. I. S. Bowen and R. A. Millikan's Paper on the Fine Structure of the Nitrogen, Oxygen, and Fluorine Lines in the Extreme Ultra-violet.
- X. Illustrative of Mr. A. J. Bradley's Paper on the Crystal Structures of the Rhombohedral Forms of Selenium and Tellurium.
- XI. Illustrative of Prof. R. W. Wood's Paper on an Experimental Study of Grating Errors and "Ghosts."
- XII. Illustrative of Sir A. Schuster's Paper on the Passage of Light through Transparent Plates.
- XIII. Illustrative of Dr. P. Lecomte du Noüy's Paper on a New Determination of the Constant N of Avogadro, based on its Definition.
- XIV. Illustrative of Prof. S. Datta's Paper on Regularities in Band Spectra.
- XV. Illustrative of Mr. G. E. Bell's Paper on the Impact of a Solid Sphere with a Fluid Surface and the Influence of Surface Tension, Surface Layers, and Viscosity on the Phenomenon.
- XVI.-XXIV. Illustrative of the Research Staff of the General Electric Co.'s. Paper on the Deformation of Tungsten Single Crystals under Tensile Stress.
- XXV. Illustrative of Messrs. R. Hill and O. R. Howell's Paper on Crystal Structure and Absorption Spectra.—The Cobaltous Compounds.
- XXVI. Illustrative of Dr. R. C. Johnson's Paper on an Effect of Argon on the First Positive Band Spectrum of Nitrogen.
- XXVII. Illustrative of Mr. H. Lowery's Paper on Pole Lines in the Interrupted Arc Spectra of Silver, Gold, and Copper.
